

How Altinity helped Santiment build a more stable & performant system

COMPANY NAME:

Santiment

ABOUT THE COMPANY:

Santiment offers a comprehensive market intelligence platform for cryptocurrencies, focusing on clean and reliable data feeds, low-latency signals and custom market analysis.

PROBLEM

Scalability and performance problems

Santiment relied heavily on ClickHouse in their day-to-day, but they faced some challenges with its performance. Resolving performance issues and bugs in addition to identifying and eliminating the root cause to prevent recurrence was of utmost importance.

“ We had **scalability and performance issues** with our current setup, which was impacting our system's performance and responsiveness.

SOLUTION & RESULT

Applying the ClickHouse expertise of Altinity engineers

Altinity Support is comprised of engineers with over a century of combined experience in ClickHouse. By tweaking schema & queries and applying best practice configuration & monitoring on clusters (just to name a few), Altinity engineers helped Santiment build a more resilient, stable, and performant system.

Optimized ClickHouse deployments

Increase in expertise

“ Altinity **helped us to tackle our existing performance problems and bugs**...we did explore other options [to Altinity], but Altinity stood out due to its **expertise in ClickHouse, cost-effectiveness, and the positive feedback from other clients.**
